- 3ft (90cm) **foldable quick-setup** circular Bowens Mount softbox
- **Quick-folding design** saves time during setup
- **Foldable speed ring** packs flat to save space
- **32-Sided circular design** for **perfect, round eyelights**
- **Universal Bowens Accessory mount:** Compatible with Aputure Light Storm series, amaran 150c & 300c
- **Create flattering soft light** with 2 front diffusion cloth options (1 Stop & 2 Stop)
- Create contrast with the **included 40° light control grid**
- **Heavy-duty construction:** steel rods for increased durability and longevity

## Target Audience

The Light Dome III is designed to help **film and video professionals** create large soft light using Bowens Mount LEDs with an efficient and portable toolkit.

**Film and video professionals** work on various projects from commercials, corporate videos, or indie to high-end film productions. These productions can be fast-paced, with little time for setup and teardown. The Light Dome III's new folding design **saves valuable time on set**, where every second counts.

Whether they are **lighting technicians or full-service video professionals**, they have limited space to store and transport their equipment to each location, making every cubic inch **incredibly valuable**. The Light Dome III packs down flat, **freeing up more space for essential tools** than cylindrical quick softboxes.

These professionals own a diverse portfolio of equipment ranging from cameras to lighting and sound, work as solo operators or with a small crew, and therefore require complete solutions to improve their workflow – like the Light Dome III.

<b>Carton Dimensions</b>	92.7 x 38.3 x 29.5cm 36.5 x 15.2 x 11.6in
<b>Carton Weight</b>	9.58kg / 21.1lbs

## Product Description

The Light Dome III is the flagship softbox for Aputure's Bowens Mount lights, featuring the same 3ft (90cm) circular shape with a brand new quick-folding, flat-pack design. Produce stunningly soft light while saving valuable time on set and space in your kit with its new quicker setup and slim profile.

**Start shooting sooner with the all-new quick-folding design.** Building the Light Dome III is now faster than ever, saving valuable time on set. Being among the fastest circular softboxes to set up and break down on the market, the Light Dome III can snap into its full parabolic shape in seconds, allowing professionals to start shooting sooner.

**More room for lights with the Light Dome III's flat-pack design.** Unlike traditional quick softboxes that maintain their cylindrical shape when packed, the Light Dome III's quick-setup speed ring folds into a slim, flat profile. Its flat-pack design requires less setup time and frees up more space for other filmmaking tools when transporting equipment, making it more portable and travel-ready.

**Simplify your toolkit with one softbox for all your Bowens lights.** Like other Aputure softboxes, the Light Dome III utilizes the prolific, universal Bowens Mount, making it the perfect pairing for any modular Aputure point-source fixture. With the ability to use just one modifier with an array of Bowens Mount LED fixtures, this versatile softbox reduces the size of your toolkit, allowing professionals to work smarter, not harder.

The Light Dome III is a ready-to-go solution for professionals to craft their soft light. Complete with a folding Bowens Mount speed ring, multiple densities of diffusion, and a 40° fabric light control grid, the Light Dome III is the ideal modifier for finetuning the perfect lighting.
